**Re: *Ex Parte* Notice
 WT Docket No. 03-264**

Dear Ms. Dortch:

This is to inform you that on February 17, 2006, I engaged in *ex parte* communication via telephone and e-mail with John Giusti, Legal Advisor to Commissioner Copps, regarding the prior filings of Crown Castle International ("CCI") in the above-referenced 2002 Biennial Review proceeding. In addition, I provided the attached materials which further explain CCI's planned service offerings through its Modeo subsidiary.

Pursuant to Section 1.1206(b)(1) of the Commission's rules, I am filing this notice electronically in the above-referenced docket. In addition, I am sending one copy of this notice via e-mail to the FCC representative listed below. Please contact me directly with any additional questions.

Sincerely,

/s/ Ari Q Fitzgerald

“Bringing Live TV to Mobile Devices”

January 2006

Modeo at a Glance

Introduction

Modeo was formerly known as Crown Castle Mobile Media and is a subsidiary of Crown Castle International Corp.

Service Offering

Nationwide DVB-H mobile media network delivering subscription-based video and audio services to wireless handsets

Wholesale Carrier Model

Enables wireless service providers to grow ARPU, reduce churn, and generate substantial gross margin without additional investment or spectrum usage

Unique Assets

US spectrum rights (5MHz nationwide), broadcast know-how, and 11,000+ towers in the U.S. will allow us to quickly and economically deploy a high-quality network featuring 10+ video channels and 24+ audio channels

Committed Partners

Nokia, Motorola and Samsung have a strong commitment to our chosen technology (DVB-H) and plan to deliver handsets to support our roll-out

Crown Castle Background

Corporate Overview

Crown Castle (NYSE: CCI) is a leading independent owner and operator of wireless network infrastructure. The company provides tower services and end-to-end network management for wireless operators

Broadcast and Content Management Experience

In the UK, Crown Castle developed the Freeview digital broadcast service in partnership with BSkyB and BBC. The service delivers a free-to-air package of 25 networks to more than 5 million viewers

By the Numbers (2004)

- 11,073 Towers in the U.S.
- Revenue: \$600m
- Enterprise Value: \$8bn
- 68 of Top 100 Markets
- EBITDA: \$289m
- Fixed Assets: \$4bn

Major US Customers

..T..Mobile..

cingular
fits you best™

Market Opportunity

Mobile video is expected to be a \$1.5bn (Frost & Sullivan) to \$3.0bn (IDC) market by 2009, with multicast services like DVB-H the largest and fastest growing segment

Mobile Video Services Revenue by Product

Note: Unicasting is point-to-point distribution of streaming video.
Multicasting is point-to-multi-point broadcasting (DVB-H)

Source: Frost & Sullivan.

Network Solution

Modeo's nationwide DVB-H network will enable high-quality video and audio content to be delivered at low cost wherever a mobile device can be used

Network Origination

Programmer supplies network feed via existing methods

- Video feeds
- Audio feeds

Modeo Operations Center

Modeo retrieves feed and reformats for wireless network

- Encoding
- Encryption

Modeo Transmitters

Tower networks deliver signal to wireless devices

FOR IMMEDIATE RELEASE

Crown Castle Mobile Media Becomes Modeo
Showcases Live Mobile TV at International Consumer Electronics Show

January 4, 2006 - HOUSTON, TEXAS – Crown Castle Mobile Media LLC has changed its name to Modeo™ LLC (“Modeo”) and announced that it plans to deliver live mobile TV to the top 30 markets across the United States. Visitors at the International Consumer Electronics Show in Las Vegas this week will get a preview of Modeo’s service in demonstrations with several of the world’s largest device manufacturers, including Motorola, Inc., and Nokia Corp.

Modeo, a subsidiary of Crown Castle International Corp. (NYSE: CCI), has unencumbered spectrum rights and unique expertise across wireless network, broadcast and content platform operations necessary to bring this innovative media service to market. During 2005, Modeo successfully piloted its DVB-H (Digital Video Broadcast – Handheld) mobile broadcast network in Pittsburgh. Modeo plans to launch the service commercially during 2006 in select major U.S. markets, including New York City. Modeo is currently working on a nationwide deployment of its network to the top 30 U.S. markets, with launches targeted throughout 2007.

“Modeo is designed to deliver a superior mobile video experience so that consumers can enjoy shows wherever and whenever they choose,” said Michael Schueppert, President of Modeo. “Our marketing campaign, ‘Modeo: For the love of TV’, emphasizes our focus on providing a fun and easy-to-use service that delivers popular news, sports, music and entertainment to a broad range of mobile devices including cell phones, laptops, portable media players, personal digital assistants and more.”

Modeo is planning to offer a compelling package of live video and audio channels and be the world's first mobile broadcast network to support podcasting. Podcasting is a term used to describe the distribution of recorded audio or video programs over internet protocol networks like DVB-H. Modeo subscribers then will be able to download dozens of video podcasts and hundreds of audio podcasts each week directly to their mobile device. Video services are designed to be broadcast in digital TV quality at QVGA resolution at up to 30 frames per second, significantly exceeding the quality offered by first generation mobile video products.

Industry Insights

Leading mobile entertainment industry analysts, including Frost & Sullivan and IDC, project the mobile video market will exceed \$1.5 billion by 2009. Multicast networks like Modeo, which use the global standard DVB-H technology, are expected to be the largest and fastest growing segment of the mobile video market. DVB-H trials are underway in several countries, including the U.S., Germany, Finland, the United Kingdom, France, Italy, Spain, Australia and Singapore. The standard is supported by leading wireless and technology firms including Nokia, Motorola, Samsung, Texas Instruments, Intel, Philips and Microsoft.

Consumer Electronics Show Demonstrations

Modeo will be demonstrating its service at the following booths at the Consumer Electronics Show at the Las Vegas Convention Center Jan. 5-8, 2006:

Motorola Inc.	Booth 8545
Nokia Corp.	Booth 30323
Microsoft Corp.	Booth 7145
Phillips	Booth 7145
Intel Corp.	Booth 7153
Kenwood	Booth 12218

About Modeo

Modeo is a subsidiary of Crown Castle International Corp. (NYSE: CCI). Modeo plans to deliver a rich media service comprised of live TV channels, audio channels and podcasting content over its Digital Video Broadcast – Handheld (DVB-H) network to a variety of mobile devices in the top 30 markets in the United States. For more information on Modeo, please visit www.modeo.com.

About Crown Castle International Corp.

Crown Castle International Corp. engineers, deploys, owns and operates technologically advanced shared wireless infrastructure, including extensive networks of towers. Crown Castle offers significant wireless communications coverage to 68 of the top 100 U.S. markets and to substantially all of the Australian population. Crown Castle owns, operates and manages over 11,000 and over 1,300 wireless communication sites in the U.S. and Australia, respectively. For more information on Crown Castle, please visit www.crowncastle.com.

Cautionary Language Regarding Forward-Looking Statements

This press release contains forward-looking statements that are based on the current expectations of the management of Modeo and Crown Castle International Corp. Such statements include, but are not limited to, plans, projections and estimates relating to Modeo regarding: (i) the development and deployment of Modeo's broadcast network and service, including contemplated timing and geographic scope, (ii) services and content to be offered by Modeo, (iii) size of the mobile video market, and (iv) market acceptance of mobile media and DVB-H. Such forward-looking statements are subject to certain risks, uncertainties and assumptions, including that Modeo's business model and the mobile media market are unproven and may produce results that are significantly less than anticipated. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those expected. More information about potential risk factors which could affect Modeo's results is included in Crown Castle International Corp.'s filings with the Securities and Exchange Commission.

Modeo is a registered trademark.
